

## WATS Report and Analysis Module (Dashboard)

All reporting is accessed using the WATS Report & Analysis application. Perform Yield analysis, drill down unit data in “Serial Number History”, analyze repair time or view all servers and clients in an interactive map!

Depending on the installed WATS modules, WATS Report & Analysis grants access to a number of different analysis reports (SPC, Yield, trends, OEE, traceability, WIP tracking etc.)

**Supported Modules and Functionality:**
